

NCT Technologies Group, Inc. Opens a Manufacturing Facility in Colorado Springs, Colorado

Colorado Springs, Colorado, June 10, 2010 – NCT Technologies Group, Inc. provider of full service business and product solutions relating to metal fabrication, product development and partnered engineering services, announces the opening of an expansion facility in Colorado Springs, Colorado to provide a closer connection with their diversified customer base and their logistical needs to support customers in Mexico and California.

NCT Technologies Group, Inc. has leased a facility at 1908 Aerotech Drive, Suite 110 and began operations in Colorado Springs on June 1, 2010. The company will initially employ 5 workers at the Colorado Springs facility with anticipated growth to 18 employees over the next 5 years. Their workforce will mainly consist of experienced and skilled fabricators in laser, press brake and welders.

“Colorado Springs was the clear choice for us to expand into the Western U.S. market,” stated owner Drew Flora. “We look forward to developing partnerships in the local market.” The company is based in New Carlisle, Ohio where it currently employs 30 and supplies services to niche manufacturers. Over the past 10 years NCT has experienced a 15% annual growth rate.

“The Colorado Springs Regional Economic Development Corporation (EDC) is pleased to have provided assistance to NCT Technologies Group, Inc.,” commented Mike Kazmierski, President and CEO of EDC. “Small high growth manufacturing companies are an important target for this region and this is evidence that our strategy is working. We are looking forward to supporting NCT as they continue to grow in Colorado Springs.”
